

People tend to gather in seaside

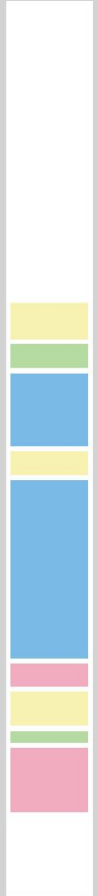

Lack of people walking in the residential area

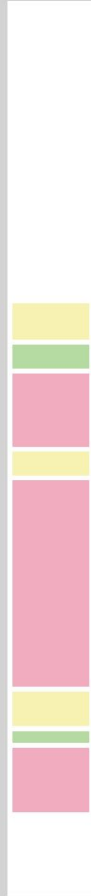

Step 1: Develop a daily schedule for the residents living within the area to determine the amount of time they spend on-site and off-site. Use this information to inform the design of housing types that cater to their specific needs and lifestyle.

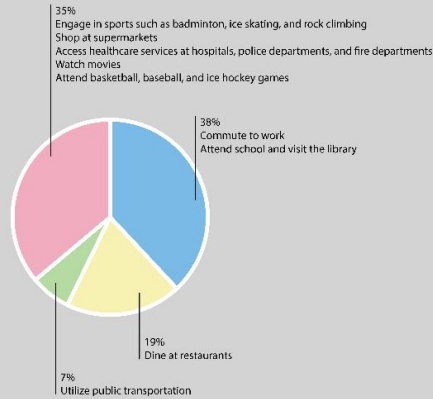

Schedule for weekday

Schedule for weekend

Step 2: Categorize the activities that residents engage in on a daily basis into four categories: **work and school-related**, **food-related**, **transportation-related**, and **entertainment-related**. Identify all the necessary facilities needed to support these activities within the area.
